

Mobile Mechanic Muscle – Second Proposal: Completion Report

Contractor: Dalessandro & Guarascio LLC
Client: Alexander Dalessandro (Mobile Mechanic Muscle)
Proposal Date: March 26, 2026
Initial Completion Date: April 16–17, 2026
Post-Completion Revisions: April 18–21, 2026

Invoice Summary – Ready for Payment

Item	Hours	Rate	Amount
Proposal 2 – Contracted Scope (custom form)	8 hrs	\$250	\$2,000
Post-Completion Client Feedback Revisions (Apr 18–21)	5 hrs	\$250	\$1,250 WAIVED
Subtotal	8 hrs billable		\$2,000
Less: Deposit Received	—		(\$750)
Balance Due			\$1,250

Rate: \$250/hour
Payment Terms: Due upon receipt. Previously agreed terms from original proposal (no refunds, completion criteria) apply.

Goodwill credit – \$1,250 waived. The April 18–21 client feedback revisions (logo link, state dropdown, copy refinements, brand badges, photos, form title) were 5 hours of work delivered at no additional charge as a one-time courtesy.

Going forward: Proposal 3 will include a standing **2-hour revision allowance** per proposal. Work beyond that allowance will be billed at the standard \$250/hour rate.

Scope of Work: Contracted vs. Delivered

A. Standalone High-End Vehicle Page

Contracted	Delivered	Status
Dedicated landing page targeting luxury/exotic vehicle owners	Full standalone page at /high-end-vehicles with cinematic dark theme (Playfair Display + Inter fonts, gold accent palette)	Completed
Unique value proposition copy	Specialized copy covering Ferrari, Lamborghini, McLaren, Porsche, Mercedes-AMG, BMW M, Bentley, Maserati, and more	Completed
SEO-optimized for "luxury mobile mechanic Nashville"	Title, meta description, and content optimized for luxury/exotic long-tail terms	Completed
JSON-LD schema markup	Service schema + FAQ schema (4 questions) with AutomotiveBusiness provider	Completed
CTA routing to /request-service	Header CTA and final CTA section both route to /request-service	Completed

Additional: Custom header/footer within the page (standalone luxury theme), hero background image from client gallery, cinematic scroll-reveal animations, stats bar (12 luxury makes, 8+ years, 60-mile radius, Mon-Sat).

B. Dedicated Request-Service Page

Contracted	Delivered	Status
Standalone page at /request-service	Live at /request-service with 4-step intake flow (terms gate + 3 form steps)	Completed
Intent gating: qualifying questions before form	Step 0: Premium service terms acknowledgment. Step 1: Vehicle category selection (4 categories). Step 2: Vehicle details + modifications + address. Step 3: Contact info	Completed
Go/No-Go camera: decision logic to filter out-of-scope requests	ZIP code validation against 60-mile Nashville radius. Out-of-area users see rejection message and cannot submit. Terms gate filters tire-kickers before form access	Completed
Anti-abuse rules: rate limiting, honeypot, required vehicle details	Honeypot field, 3-submission-per-session rate limit, 3-second speed check, Google reCAPTCHA v3 (invisible)	Completed
All CTAs route here as single conversion endpoint	All service pages, location pages, all-services, high-end-vehicles, and /contact (JS redirect) route to /request-service	Completed

Form submission flow:

1. User reads premium service terms and clicks "I Understand – Continue"
2. User selects vehicle category (Luxury/Exotic, Commercial Equipment, Muscle/Classic, Every Day Driver)

3. If Luxury/Exotic: entire form transforms to cinematic dark/gold design language
4. User enters vehicle details: year, make, model, VIN (conditional), registered state, full address, modifications & configuration, issue description
5. Go/No-Go check: ZIP validated against Nashville 60-mile service area
6. If passed: user enters contact info (first name, last name, phone, email, preferred contact method)
7. Google reCAPTCHA v3 executes invisibly
8. Submission sent to category-specific HubSpot form via API
9. Success confirmation displayed

Rejection paths (user told "we can't help"):

- ZIP code outside 60-mile Nashville radius → "Outside Our Service Area" message with option to go back and try a different ZIP

C. Form Changes

Change	Contracted	Delivered	Status
Remove Preferred Time	Remove field (not operationally useful)	Not included in custom form	Completed
Add Go/No-Go gating	Conditional form sections based on service eligibility	3-step flow with ZIP-based Go/No-Go gate between steps 2 and 3	Completed

Technical implementation: Custom HTML/CSS/JS form submitting to HubSpot Forms API v3. Not using HubSpot's embedded form widget — full control over UX, validation, and gating logic.

HubSpot integration:

- 4 cloned forms (one per vehicle category) with CAPTCHA disabled to allow API submissions
- Original form (`4dfc54af-...`) retained with CAPTCHA for legacy embedded use
- Fields mapped: `firstname` , `lastname` , `phone` , `email` , `vin_license_plate_number` , `year` , `make` , `model` , `vehicle_registration_state` , `state` , `address` , `message`
- Category, modifications, preferred contact method, vehicle address, and swap details appended to `message` field to conserve HubSpot free tier property slots
- `service_type` created as custom dropdown property

D. Email Update Across HubSpot-Driven Pages

Contracted	Delivered	Status
------------	-----------	--------

Contracted	Delivered	Status
Update client email on all HubSpot-managed pages	Email removed from all pages entirely (client does not want email contact)	Completed
Templates already updated; covers pages deployed through HubSpot	Removed from: <code>all-services.html</code> JSON-LD, <code>high-end-vehicles.html</code> footer + JSON-LD, <code>footer-content.html</code> , <code>partials/footer.html</code>	Completed

E. CTA Re-Routing

Contracted	Delivered	Status
Re-route <code>#quote-form</code> anchors to <code>/request-service</code>	All service-page and location-page template CTAs updated from <code>#quote-form</code> to <code>/request-service</code>	Completed
All CTAs site-wide to <code>/request-service</code>	Zero <code>#quote-form</code> or <code>mailto:</code> references remain in codebase. All CTAs route to <code>/request-service</code>	Completed

Additional Scope (Added During Project)

F. Remove Email from Website Completely

Delivered	Status
Removed visible email links from both footer templates	Completed
Removed <code>"email"</code> field from JSON-LD schema on all-services and high-end-vehicles	Completed
Client directive: no email contact, only through form	Completed

G. American First Finance Integration

Delivered	Status
External financing link added to all page footers (both footer templates)	Completed
Link added to all-services CTA section, high-end-vehicles footer, commercial-equipment, muscle-cars	Completed
Link added to request-service form (step 3, before submit)	Completed

Delivered	Status
Footer "Book Appointment" converted to secondary button style in Get In Touch section	Completed
URL: https://americanfirstfinance.com/app/?dealer=32791&loc=1&src=UA	Completed

H. Two New Pages (Main Site Theme, Full SEO)

H1. Commercial Equipment Page

Delivered	Status
Full page at /commercial-equipment with main site theme (Poppins, teal/navy)	Completed
Equipment grid: skid steers, excavators, generators, forklifts, box trucks, trailers, diesel engines, mowers	Completed
Services list: engine/drivetrain, hydraulics/pneumatics, electrical/controls, brakes/steering/suspension	Completed
FAQ section (4 questions)	Completed
JSON-LD: Service schema + FAQ schema	Completed
SEO: title, meta description, structured data	Completed
Client gallery image added below hero	Completed
CTAs to /request-service + financing link	Completed

H2. Muscle Cars Page

Delivered	Status
Full page at /muscle-cars with main site theme	Completed
Vehicle grid: Chevrolet/GM, Ford, Dodge/Mopar, Classic & Vintage, Modern Performance, Trucks & Muscle SUVs	Completed
Services list: engine/performance, brakes/suspension, electrical/ignition, cooling/exhaust/drivetrain	Completed
FAQ section (4 questions)	Completed
JSON-LD: Service schema + FAQ schema	Completed
SEO: title, meta description, structured data	Completed
3-image gallery from client HubSpot photos (Barracuda, Super Bee, service shot)	Completed
CTAs to /request-service + financing link	Completed

Infrastructure & DevOps Delivered

Item	Detail
Deploy script updated	<code>scripts/deploy-pages.js</code> now deploys all 17 pages: all-services, high-end-vehicles, request-service, commercial-equipment, muscle-cars, 7 service pages, 5 location pages
Page mapping updated	<code>.hubspot-pages.json</code> includes IDs for all new pages (request-service: <code>211170040586</code> , commercial-equipment: <code>211170041176</code> , muscle-cars: <code>211170040588</code> , high-end-vehicles: <code>210210284161</code>)
HubSpot forms (4 clones)	Original form retained with CAPTCHA. 4 category-specific clones without CAPTCHA for API submissions (Luxury, Commercial, Muscle, Every Day)
Google reCAPTCHA v3	Site key <code>6LeZL7ss...</code> integrated on request-service page for invisible bot detection
<code>service_type</code> property	Created as custom dropdown in HubSpot
Design Manager API	Footer partial managed programmatically via Templates v2 API (<code>PUT /content/api/v2/templates/206542447704</code>)
<code>/contact</code> sunset	JS redirect installed, navigation updated, managed page links replaced
Service radius updated	All JSON-LD schemas updated from 25 miles to 60 miles
Header CSS overrides	Inline theme settings for managed pages (logo sizing, left-aligned layout, mobile responsive)
Footer partial	Synced between local repo (<code>src/templates/partials/footer.html</code>) and HubSpot Design Manager

Page Inventory (17 Managed Pages)

Page	Slug	HubSpot ID	Status
All Services	<code>all-services</code>	206890247351	Published
High-End Vehicles	<code>high-end-vehicles</code>	210210284161	Published

Page	Slug	HubSpot ID	Status
Request Service	request-service	211170040586	Published
Commercial Equipment	commercial-equipment	211170041176	Published

Additional Work Delivered (Beyond Original Proposal Scope)

Form Rework – Vehicle Category System (April 17, 2026)

Replaced 12-service-type picker with 4 vehicle category system:

- Luxury / Exotic (gold Playfair Display selected state, full lux mode transformation)
- Commercial Equipment (road vs off-road equipment type toggle)
- Muscle / Classic (auto-shows deep modification detail)
- Every Day Driver (clean standard flow)
